That appeared to be a mistake to call it PFTeDA in previous table. The identity should be PFTrDA.

Thanks,

Yaorong

But we called it PFTrDA before

Thanks
Thuy

It is correct, Thuy. PFTeDA does not have the confirmation transition. The value for PFTeDA would be 0.03 ppb, if just use the unconfirmed value.

Thanks,

Yaorong

Yaorong

When we have a chance please check the new reported value for PFTrDA in the 02032021 spreadsheet for unused 30-gallon drum (0.11 ppb). In the previous spreadsheet, we reported PFTeDA (0.29 ppb). I wonder if it could be a typo in the new spreadsheet

Please see attached spreadsheet for comparison between the new and old numbers for the drums

Thank you

Thuy

Hi Thuy,

Here is the final data for the container rinse and Anvil product we analyzed earlier. There are some revisions to the preliminary results reported earlier. Hopefully this version will be final.

Thanks,

Yaorong

Kimberly
Here is the revised BEAD/ACB proposed next steps for PFAS.
I left your comments in so you can see how we address them
Let me know if you need additional information
Thuy

Hi Kimberly,

We should get it to you later tomorrow. We are reviewing all the data on the instrument and got snowed out yesterday. We should complete the data file and the work plan tomorrow.

Thanks,

Yaorong

Hi Thuy!

Checking in on the status of your re-worked file, the workplan 1-2 pager, and the updates to the briefing paper. Let me know when I might be able to get a copy for review. No one's asking yet, but I anticipate a question from above soon. Thank you!

Subject: RE: EPA Preliminary PFAS Results

Yes, Kimberly. A conversion factor is used.

We initially reported the results as total nanograms of each compound in one rinse of 50 ml. The latest values are the total nanograms divided by 50 ml. The results are now expressed as nanogram/ml (or ppb) of rinsate for the 50 ml rinsate sample.

Thanks,

Yaorong

The concentration data seems to have changed a lot from previous reports...was there a concentration conversion made that changed it?

Dear Michal,

Thank you for your time this morning. As a follow-up to the briefing, please see attached for the most-current version of our draft data report. This addresses some of your questions on which PFAS species were present and at what amounts. We will also update the briefing paper to include this information, as requested.

Thank you, and please let us know if you have any questions.

Best,
Kimberly
